

The north section of the project included this four-level flagship interchange at Interstates 35W and 820.

NTE MOBILITY PARTNERS

EXPRESS PURPOSE

Conducted as part of a unique public-private partnership, the recently completed \$1.4-billion upgrade of a nearly 6.5 mi long section of Interstate 35W in Fort Worth helps reduce congestion along a busy transportation corridor. Part of the regional system known as the North Tarrant Express, the project adds managed toll lanes and expands and renovates existing highway infrastructure, all of which will be managed by a private entity for decades to come.
